

Saptha Event Portal - Product Analysis

1. Marketing Highlights (USPs)

- AI-Driven Judge Matching: Semantic analysis of expertise vs projects.
- Automated Narrative Reports: Transforming raw data into success stories.
- Multi-Tenant Architecture: Independent club operations under one umbrella.
- End-to-End Lifecycle: Discovery -> Registration -> Check-in -> Judging -> Certification.
- Industrial Tech Stack: Python/Flask, PostgreSQL, Firebase, Gemini AI.
- Omnichannel Access: PWA support for seamless mobile experience.

2. User-Centric Capabilities

- Super Admin: Global oversight, audit trails, and institutional analytics.
- Club SPOC: Autonomy over event creation and automated outcome reporting.
- Coordinator: Real-time management via QR scanning and on-spot registration.
- Participant: Frictionless discovery and instant certificate retrieval.
- Judge: Focused evaluation portal with streamlined scoring.

3. Gap Analysis: Path to Market-Ready Product

Technical & Architectural Gaps:

- Database Consolidation: Transition from hybrid adapter to single source of truth.
- CI/CD Automation: Implementation of automated testing and deployment pipelines.
- API Specification: Formal OpenAPI/Swagger documentation.

UX & Interface Gaps:

- Design System: Move to a cohesive SaaS-like UI (e.g., Tailwind CSS).
- Accessibility: Compliance with WCAG standards for institutional use.
- Onboarding: Interactive walkthroughs for new SPOCs.

Product & Business Gaps:

- Calendar Integrations: Sync with Google/Apple/Outlook.

Saptha Event Portal - Product Analysis

- Legal Framework: Terms of Service and Privacy Policy (GDPR/DPDP).
- Monetization: Subscription management for B2B scaling.
